# Parts of a Seed

I am the "baby plant." I contain the parts that will become the plant's roots, stem, and leaves. I am the:

I protect the seed from injury and from drying out. I am the:

I surround the baby plant and I am its source of food, especially in monocots. I am the:

I am the "seed leaf," part of the baby plant. I store food, especially in dicots. I am the:
