# The Skeletal System

Can you name these bones? Write your answer in the boxes provided.

Note: Use the formal name for the bone -- for example, write "coccyx," not tailbone.

A 3D illustration of a human skeleton in a standing pose with one arm raised. Pink dotted lines connect 14 specific bones to empty rectangular boxes for labeling. The boxes are arranged in two columns of seven. The bones being pointed to are: the thumb, the index finger, the middle finger, the ring finger, the pinky, the wrist, the elbow, the shoulder, the neck, the jaw, the hip, the knee, the ankle, and the foot.
