Useful and Harmful Materials

Which statements in the box below explain why these materials can be harmful to us?

Write the letter of the corresponding statement in the box below each picture.

- a. Alcohol can catch fire easily.
- b. Broken glass can cut your skin.
- c. Candy wrappers are rarely, if ever, recycled and just add to our trash.
- d. Drained batteries can leak harmful chemicals.
- e. Expired medicine may not work and may have gotten contaminated.
- f. Insecticides can also cause poisoning to humans.
- g. Mold can make you sick.
- h. Muriatic acid can cause headaches, burns, and blindness.
- i. Sharp, rusty metal may contain bacteria that causes tetanus.
- j. Used syringes can prick us, pass on sickness, and add to our trash.
